EXPERIENCE

Tech Analyst - Cloud and DevOps Engineer

Deloitte

January 2025 – Present

Coimbra, Portugal

- Developed and maintained cloud-native serverless applications using AWS Lambda, API Gateway, Python, and JavaScript within microservices-based architectures
- Designed, implemented, and integrated RESTful APIs connecting modern cloud platforms with legacy enterprise systems and third-party services
- Automated infrastructure provisioning and configuration through Infrastructure as Code (IaC) using AWS CloudFormation and Terraform
- Built and maintained CI/CD pipelines and deployment automation workflows using GitHub Actions, AWS CodePipeline, and CodeCommit
- Implemented secure authentication and Single Sign-On (SSO) solutions using Auth0, improving identity and access management capabilities
- Developed monitoring, logging, and operational dashboards to enhance system observability, performance tracking, and incident response

Intern

Mindera

October 2023 – July 2024

Coimbra, Portugal

- Gathered and translated business requirements of legacy processes into standardized technical process documentation and workflow specifications
- Designed and modeled automated workflows using BPMN 2.0 within distributed and asynchronous system architectures
- Developed workflow automation solutions using N8N to streamline operational and business processes
- Built and maintained microservices in Java and Python to support process automation and system integration
- Contributed to the design of scalable, event-driven architectures aligned with existing infrastructure and technology stacks
